

INTELIBS UNVEILS UNIQUE APPROACH FOR ADVANCING 3G AND 4G NETWORKS AND APPLICATIONS

*Highest Performing In-building/Outdoor Wireless Solutions are
Based on Expertise and Innovations from Leading Telecom Geographies*

CHICAGO (4G World) – September 15, 2009 – [Intelibs, Inc.](#) unveiled today a unique business model and approach that enables deployment of the highest performing in-building/outdoor wireless solutions and tackles key obstacles that limit the growth of 3G and 4G services. The company solves these problems by leveraging their global expertise and technology from the most advanced telecom regions of the world for the benefit and advancement of the U.S. market. Intelibs' diverse product and services portfolio delivers the ideal ecosystem for 4G evolution.

Intelibs creates best-of-breed solutions for indoor/outdoor wireless communications through global collaboration partners, expertise and the company's own patent pending technology. Intelibs' solutions result in networks that overcome barriers such as interference, capacity and access to ensure seamless coverage from the deepest recesses of buildings, to extended living, learning and working zones.

“There has never been a better time to explore innovative new approaches for advancing 3G and 4G wireless and mobile broadband in the U.S.,” said Harry Kim, SVP of Kisan Telecom. “Intelibs uniquely combines awareness of market requirements here with advances from other parts of the world. We invested in Intelibs because we believe in the team's vision, expertise and technology. Their portfolio of products and services create the ideal ecosystem for enhanced solutions.”

The company helps service providers offer the most extensive coverage and advanced broadband wireless features making exciting new applications possible, enabling the convergence of voice, data and proximity/location. Intelibs also works with enterprises and other types of organizations to help these companies take advantage of the latest strides in wireless technologies that optimize 3G and 4G.

“Intelibs addresses a compelling market need in overcoming known barriers to 3G and 4G wireless performance,” said Phil Marshall, senior research fellow, Yankee Group. “By combining international expertise and advanced technology, they have emerged with a fresh approach to addressing the growing demand for solutions to overcome coverage challenges and provide seamless service.”

Intelibs was founded in 2008 and is fully operational, with a world class team and products in place. Intelibs is backed by Kisan Telecom and is its exclusive distributor in the U.S. Kisan has a 40 percent market share for in-building 4G wireless solutions in Korea.

“We apply real world successes to benefit everyone in the wireless value chain,” said Seyong Park, CEO of Intelibs. “Intelibs introduces global partners to new regions. As demands and needs grow, service providers, businesses and users all benefit from these partnerships, solutions, expertise and market learning’s.”

About Intelibs

Intelibs delivers market leading, best-of breed CDMA, WCDMA, EVDO, WiMAX and LTE (in development) in-building and outdoor solutions that overcome barriers such as interference, capacity and access to ensure seamless coverage from the deepest recesses of buildings, to extended living, learning and working zones. Intelibs applies technology and expertise from leading-edge international 3G and 4G installations to U.S. market needs, helping service providers and other organizations deploy the highest performing wireless solutions to meet evolving network needs. Through global expertise, collaborative international consulting, and the company’s own patent pending technology, they source the best solutions from around the world and introduce partners to new regions.

Intelibs is privately held with their corporate headquarters in New York with team members and partners working from locations throughout the U.S. and Korea. For more information, please visit www.intelibs.com.
